OUR PROMISE

SAFETY

SAFETY IS OUR FOUNDATION

Safety isn't just a priority—it's part of everything we do. From pre-planning to final walk-throughs, we build with care, attention, and responsibility for everyone on and around the job site. Our crews are trained, equipped, and empowered to lead with initiative, act with integrity, and look out for one another every step of the way.

QUALITY

UNMATCHED QUALITY, EVERY STEP OF THE WAY

We believe that quality is the result of doing the right thing—even when no one's watching. From grading and concrete to utilities and finish work, our teams follow proven processes, hold tight tolerances, and take pride in craftsmanship that lasts. Every detail matters, and every job is built to perform.

INGENUITY

BUILDING SMARTER, INNOVATING BETTER

At TWX, we don't just follow the blueprint—we rethink it. With each project, we leverage the latest technology, innovative methods, and practical solutions to overcome challenges and deliver results that exceed expectations. Our ability to adapt and find smarter ways to build is what keeps us ahead.

CORE VALUES

- 100% CUSTOMER SATISFACTION
- HIGHEST SAFETY STANDARDS
- KNOWLEDGEABLE, EXPERIENCED TEAM
- FAIR & COMPETITIVE BID PROCESS
- ON TIME & ON BUDGET
- THE RIGHT EQUIPMENT FOR YOUR JOB

OUR SERVICES

EARTHWORK

Our earth moving fleet allows us to use the right equipment for the right job—both small and large-scale projects.

CONCRETE

TWX delivers expert concrete placement—vertical or flat—driven by innovation, proven performance, and an uncompromising commitment to safety. No job is too large. From complex structures to high-volume pours, we bring precision, speed, and safety to every site.

UTILITIES

TWX provides comprehensive utility services, including installation and maintenance of Class D water lines, wastewater systems, and sewer infrastructure. Our team ensures reliable, efficient solutions that meet both municipal and private project demands.

STORM WATER

We specialize in storm water management, from repairing and restoring existing facilities to constructing retention ponds, detention systems, and erosion control measures. TWX delivers solutions that protect property, enhance site drainage, and comply with all regulatory standards.

KEY PROJECT HIGHLIGHTS

RIVER CROSSING

Situated at 54th Street and Riverside Drive, this **$10 million infrastructure** overcame demanding conditions, including bedrock excavation, deep shoring, and continuous dewatering. The scope featured **two earth dams, full riverbed restoration**, and the **construction of two massive junction boxes**, one plunging 40 feet below grade. From earthwork and concrete to structural stabilization, pipe tie-ins, and water restoration, every phase was executed with precision. The result: **a complex project delivered on schedule, with zero safety compromises.**

GREENHECK 700

TWX delivered earthwork, utility installation, and concrete paving services for the Greenheck 700 project in Tulsa, OK. With a **$10.8 million contract** value, our team partnered with Choate and Flintco to move **53,816 cubic yards of cut** and **133,357 cubic yards of fill**, install **4,270 linear feet of storm drain** and **3,200 linear feet of waterline**, and place **287,840 square feet of concrete paving**. TWX also constructed a Contech bridge structure, associated walls, and an underground detention pond to support the site's stormwater management. Despite challenges with rock blasting and excavation, the project was completed on schedule, reinforcing TWX's reputation for **quality, performance, and reliability**.

EQUIPMENT & CAPABILITIES

At TWX, we match every project with the right tools, ensuring that no task is too big or too complex. Our fleet of state-of-the-art equipment is maintained to the highest standards, allowing us to execute each job safely, efficiently, and with precision. Delivering exceptional results every time.
